PHP Developer

I am working as a PHP or Backend Developer in LALA Group Of Companies involves designing, developing, and maintaining web applications and systems using PHP frameworks such as Laravel and CodeIgniter. I strive to deliver cutting-edge API solutions that drive innovation and contribute to the company's digital transformation. I excel not only in API development but also in database management, playing a pivotal role in ensuring the efficiency and reliability of our systems. The Projects I worked are below :

- **TRIPPLANNER.COM**
  I Developed both Restful APIs for the tripplanner.com and Managed PostgreSQL database for efficient data storage and retrieval enhancing site performance and user experience
- **UMRAH JOURNEY.COM**
  Developed dynamic APIs to provide real-time updates on travel schedules, accommodation, and transportation
- **UMRAH FURAS.COM**
  Developed APIs to handle user authentication, package selection, and booking processes. Managed a PGSQL database to ensure efficient data handling and retrieval.
